

## "Creation or Evolution?, Part 1"

↪ We are going to be pursuing some very important conclusions that we must deal with as believers in order to follow Jesus correctly and to bear witness to the truth in our world. Don't be intimidated by the science, science is just knowledge and the seeking out of knowledge. You do not have to be a scientist to know things. Math is a part of science, such as  $2+2=4$ , its repeatable and true everywhere we go, it is a scientific fact. Observation is a part of science; how do I know many things? I have observed them. To be science, it has to be observable and repeatable which eliminates faith, faith is not science, "Faith is the confidence that what we hope for will actually happen; it gives us assurance about things we cannot see." Hebrews 11:1. Nowhere in our study will I be proving to you that God created the earth in 6, consecutive, 24-hour days, that process is neither observable nor repeatable! I do intend to prove to you that the Bible clearly does teach a 6-day creation, and that we cannot say that we believe the Bible and also say that we don't believe in a 6-day creation. I also intend to prove to you that Evolution isn't science either but is a belief system. It is neither observable nor repeatable. It is belief system that looks at the evidence, interprets it through a biased filter and says, "we believe it happened this way." Anytime anyone asks us to believe something or tells us what they believe, science has ceased, science and belief do not mix. It's not that scientist can't believe things, just don't let them make you think that what they believe is science!

---

↪ Evolution has never been proven scientifically, nor will it be, in my opinion. The missing links that they believe existed are still missing! The proof of evolution has been pursued with extreme bias for over 150 years, careers and millions of dollars have been staked on proving it to be true scientifically, but we still have nothing. Bias, they didn't send someone out to find the truth whatever that may be, instead, they send someone out to prove that evolution is true, to find the missing links, to find evidence of the evolutionary process which they believe to be true. They funded this project with millions of dollars and promise millions to the person who finds these missing links and evidence, not to mention fame and the unknown missing link to be named after him or her. They now have millions of dollars not to mention shame at stake if they cannot produce. With millions of reasons to find a link, they "find" one! It is not until years later and the public being duped by false evidence that these links have been proven as frauds, read Evolution's Blunders, Frauds and Forgeries by Jerry Bergman Ph.D.

---

↪ After hundreds of scientists staked their reputation and wrote thousands of papers and books, and were backed by millions of dollars to prove evolution, we still only have:

- ✓ "Through unknown chemicals in the primordial past that worked through "Unknown" processes which no longer exist, but, nevertheless, could produce unknown life forms, which are not to be found, but could, through unknown reproduction methods, spawn new life in an unknown atmospheric composition in an unknown oceanic soup at an unknown time and place."

↪ "Nobody times nothing equals everything" is the evolutionary equation. That is not science! Yet, we are still indoctrinated on evolution as if it were factual. Much to the chagrin of evolutionists and "natural sciences", evolution requires us to believe in the super-natural. The laws of nature (which are observable and repeatable) have to be suspended for the process of evolution to take place. By the way, that is exactly what the Bible describes as supernatural (i.e.. not natural but above the natural). Don't look for anything in the natural to prove the supernatural, since, by definition, those things do not naturally occur. Again, evolution cannot be proven because supernatural can never be science.

---

---

---

**1. We are left with two belief systems that require us to believe in the supernatural.**

- ✓ I do not in any way claim to an expert on evolution, but I am pursuing an expertise in the Scriptures, day in and day out. From that expertise, I can tell you that if the first 7 chapters of Genesis aren't true and literal, then the rest of Bible cannot be trusted. Genesis is foundational for the rest of the Bible, if chapters 1 and 2 of Genesis do not tell us the truth, then why should we believe any other part of Scripture? Genesis is referred to in both the Old Testament and the New Testament more times than any other book, Jesus referred to it often and never indicated that He thought it was unreliable. Genesis gave the logical basis for the message He brought, John 5:15-47. Genesis is the seed plot for all that grows in the Bible. How important is this issue of evolution vs. creation? As important as "is there a God?"
  - ✓ Genesis tells us that God is our creator, and the New Testament tells us that our Creator is also our Redeemer, but if He wasn't our Creator to begin with how can we rely on Him to redeem us? It is as important as the question of, is there morality? If Creation is true, then we answer to the Creator and His rules. If Evolution is true then, we are biological accidents who emerged by chance, and, therefore, right and wrong are relative (examples: situational ethics, anarchy and chaos). If evolution is true, then humans are just animals and aborting unwanted cats is no different than aborting unwanted children. If evolution is true there is no moral distinction between a human and a housefly. Squashing one is no different than squashing the other.
- 
- 

- ✓ I have a question for Evolutionists, why don't they believe and follow their own stuff? For an Evolutionist to be consistent with his beliefs, he should make it his personal goal to shut down all hospitals, stop all medications, and allow the weak to simply die. Prolonging life medically of the genetically less endowed works against survival of the fittest. For example, why should we continue to look for the cure for AIDS or the Corona virus? If evolution is true, these viruses are nothing more than nature's way of selecting against those who inferior. The Corona virus is nature's way of selecting against inferior immune systems and those with co-morbidities. If Evolution is true, the best thing for the survival of our species is for those with deficiencies to hurry up and die. The battle against the extinction of any species should immediately cease since by destroying other species we prove we are the highest evolved. The evolutionist while claiming to be intellectual is not really thinking. Maybe he should try and explain how we evolved a conscience in the first place.
  - ✓ The Fruits of Evolution; Hitler and the third Reich (after all, we must applaud him for carrying evolution to its natural ends, i.e., the Survival of the Fittest). Evolution strikes at the base of Christianity, all Christian doctrines have their basis in Genesis, marriage, sin, judgment, death, a 7 day-week, atonement, clothing, morality, rules, Satan and the Gospel.
- 
- 

**2. We have two options: either we believe Genesis as it is written, or we do not.**

- ✓ Instead of: "Nobody times nothing equals everything"; We have the divine equation in Genesis 1:1, "In the beginning God created the heavens and the earth. Either you believe that God created the Heavens and earth out of nothing, or you do not believe it. If you believe that God created, then you are left with only Genesis 1 and 2 as the sole explanation for how He did it. If you do not believe that, then you do not believe what the Bible says, so stop saying that you do! It is dishonest to say that you believe the Bible and then turn around and not believe it.
