

- ↳ Evolution would have you believe that mindless forces produced all the complexity and order that we see today, but that has never happened: mindless forces have never produced complexity and order. Explosions don't clean things up and tornados don't assemble 747's from junk yards or arrange novels from Scrabble factories. There is a reason for that, and that reason, as defined by science, is a thing called entropy, we know it from the Bible as “the curse.” Science has codified and defined it, but it is actually something everybody has known almost intuitively since from the beginning.
-

1. The curse soundly defeats evolution as a theory.

- ✓ There are scientific laws that we know and can observe, they are universal and without exception unless supernatural forces intervene. Again, both the Bible and evolution require us to believe in the supernatural.
 - ✓ First Law of Thermodynamics, energy is conserved, there is no more energy, or, maybe in a more concrete way of thinking, there are no more atoms (little balls of energy) being added or subtracted from the system. The Bible is in total agreement with this law: God rested and never created another thing after the 6th day. All atoms or energies were created in those days, and nothing is being added to them. The universe is only rearranging atoms, and, in some cases, subatomic particles.
 - ✓ Second Law of Thermodynamics, Law of entropy, Entropy increases as time passes, things go from a state of order to a state of disorder. This is a law because there are not any exceptions to it. We cannot create as God has created (from nothing to something), but we can create from one set of atoms and organize them into another set. But, whatever we organize will become unorganized over time; it will not stay static. The curse or entropy means everything is headed back to what it was before God organized it into creation, back to its elemental state. Entropy is happening to everything living and non-living there are no exceptions. Balloons don't inflate on their own, they deflate. Everything is going from a high state of order, thus low entropy, to a low state of order or high entropy. The sun, the earth, the solar system and every last thing with in it was better in past than it is today; more organized; more together; and it is all headed back to a state of equilibrium. Your car is headed to a state of equilibrium, someone organized the elements found on earth, but those elements and molecules are headed back to where they came from, back to the earth from which they came. Your body is headed to a state of equilibrium, someone organized the elements found in dust and turned it into the extremely complicated organism called you; but because of the law of entropy, you are headed down hill back to dust, back to the state of equilibrium that your body came from. This law defeats Evolution because it states clearly that the natural order of all things is downhill not uphill. Things don't evolve they devolve. Things don't get better over time; things don't become more organized over time, they come apart.
-

2. This law is in complete agreement with the Scriptures: Genesis 3:1-3.

- ✓ Death is the perfect illustration of the law of entropy everything is dying and degenerating. Death came as result of the Creator God removing His blessing from the universe and replacing it with the curse. “And to the man he said, “Since you listened to your wife and ate from the tree whose fruit I commanded you not to eat, the ground is cursed because of you. All your life you will struggle to scratch a living from it. It will grow thorns and thistles for you, though you will eat of its grains. By the sweat of your brow will you have food to eat until you return to the ground from which you were made. For you were made from dust, and to dust you will return.” Genesis 3:17-19.” It's all been cursed because of sin, Romans 8:18-21. The curse is a law of nature, and it is observable and repeatable and has no exceptions. Whether we believe in God or not, the curse is a scientific fact.
-

"Creation or Evolution?, Part 4"

- ✓ Evolution was invented, not because the facts demanded it but in spite of the facts, to eliminate the Creator who is also Judge, so that people could imagine themselves free to do whatever they want without guilt or consequence. In Mein Kampf, Hitler writes in expression of His sadistic mind, that the evolutionary theory was the justification for the destruction of the masses who threatened the evolution of the super race. "He who would live must fight. He who does not wish to fight in this world where permanent struggle is the law of life has not the right to exist." The head of the Nazi labor front said that Hitler's massacres expressed, "the highest and best in manhood." Julian Huxley, biologist and evolutionist, wrote in 1964, "Evolution is the most powerful, most comprehensive idea that has ever arisen on earth." It is the single, greatest, satanic lie the world has ever known, because it eliminates the need for a creator and our answering to Him. Darwin, "I am determined to escape from design and a personal God at all costs." Logic says, "Oh, there's a universe, Hmmm, somebody made that." What else would it say?; "there's a building, I wonder who made it?"; there's a piano, I wonder who made it?" There is a universe, vastly more complex than a piano—someone who is very, very powerful and very, very intelligent made it. It is logical suicide to say chance created all of this. Logic abandoned leaves us with myth, but the enemies of myth are empirical data and God-given reason. So, in order to be an evolutionist, and believe that chance created everything, you will have to reject empirical data and embrace irrationality. If you love your sin enough, you'll do it!
-
-

3. There's a fine line between faith and stupidity.

- ✓ The odds of life originating by chance have been calculated to be one chance in $10^{40,000}$. This still isn't a good picture since to cover the earth to the depth of 100 feet with silver dollars only gives 1% of that preposterous number. Let me give you an idea of the magnitude of these odds:
 - 1) Cover the entire face of the earth with silver dollars including the surface of the oceans to a depth of 100 feet.
 - 2) 2. Color one of those dollars red.
 - 3) Allow a blind person to wander over these dollars and pick up just one (can take as long as they like).

Famous evolutionist, Thomas Huxley said, "No one would bet on anything so improbable happening...And yet it happened." (He's a believer in evolution!) Dr. George Wald, Nobel Prize winner of Harvard University, "One has only to contemplate the magnitude of this task to concede that the spontaneous generation of a living organism is impossible. Yet here we are..."
